WHAT WE DO:

Upon receipt of your request for a quote, we will research our Domestic and International Pharmacies to obtain the best available prices

- We will always quote in U.S. dollars.
- We will telephone or email you within hours with the information you have requested.
- If refills are authorized, you will receive a reminder 30 days prior to your need to reorder to insure that you don't run out.
- If we cannot save you money, we will advise you to shop your medications locally.

Is it Legal?

The United States Food and Drug Administration policies provide that U.S. residents may import FDA approved prescribed medications for personal use, and not commercial distribution, in quantities not to exceed a three-month supply. The prescribing doctor's name and address must be included in any package entering the US.

Is it Safe?

The medications produced by our selected overseas manufacturers are FDA approved for use in the United

States. Each manufactured batch of medications is inspected by one or more government agencies. The list of agencies inspecting these manufacturers include the USFDA, Health Canada, FDA-India, agencies representing countries that are members of the British Commonwealth of Nations and the European Union. Representing smaller countries importing from these same manufacturers is the World Health Organization.

outside the US have government controlled health-care that manages the price of medication in their countries; the goal being affordable medication for everyone. You Save On Meds takes advantage of those prices.

Do I need a prescription?

Yes. All orders must be accompanied with a valid written prescription from a licensed physician. The staff at You Save On Meds will contact your doctor(s) to get the necessary paperwork.

Your Questions. Our Answers.

Who benefits the most from using this service?

- Uninsured: Savings between 30-75% over American retail prices.
- High Deductible Plans: Many people who never reach their deductible are paying almost full retail prices for their prescriptions out of their own pocket.
- Medicare Part D: Fallen into the "donut hole" and won't get out before year end and non-formulary medications.
- Multi-tier Prescription Drug Discount Plans: Tier three and four drugs are less costly in Canada and overseas.
- Fully Insured: Drugs not in your formulary or who have opted out of prescription drug coverage.

States. Each manufactured batch of medications is inspected by one or more government agencies. The list of agencies inspecting these manufacturers include the USFDA, Health Canada, FDA-India, agencies representing countries that are members of the British Commonwealth of Nations and the European Union. Representing smaller countries importing from these same manufacturers is the World Health Organization.

Is it Affordable?

Many medications that are name brand in the US are generics overseas. Patent laws vary by country. The active ingredient(s) in the generic version is identical to the U.S. name brand drug. Each manufacturer must demonstrate equal efficacy as the brand name counterpart before getting a license to manufacture. In addition, most countries

How long does it take for customers to receive their discounted prescription medications?

Normal overseas delivery is within 15 business days (3 weeks) from the date you place your order. Times vary dependent on how long it takes packages to pass through U.S. customs. For an extra charge, expedited shipping is available from some countries. Medications shipped from the U.S. pharmacy take no longer than 10 days.

What kind of medications don't you sell?

You Save On Meds does not provide any controlled drugs from Canada or overseas; it's illegal. Some Schedule 4 medications are available from our U.S. pharmacy; call first. Any medication that requires refrigeration during or after shipping is unsafe to provide.
